

1974

Categories

- Carcass meat
- Non-carcass meat
- F+P potatoes
- F+P vegetables, no potatoes
- F+P fruits
- Milk + Milk products
- Other cereals + cereal products
- Fats

- This could be done for every year in the data
- This we could have up to 4 layers if we used all four "descriptions" from the full data set

- Inner circle is the categories
- As the circle fans out, it is further divided into its subcategories until it reaches the smallest sub-category.
- Blank spots = missing data — amount of the sub-categories did not add up to the upper category
